The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).									
Status									
1)	Responsive to communication(s) file	ed on .							
-	-	2b)⊠ This action is	non-final.						
3)□	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is								
	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

Claim 3 is objected to because of the following informalities: It is not clear to the examiner where the information is being displayed. The claim will be examined as best understood by the examiner. Appropriate correction is required.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 7 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. A computer program not embodied on a computer readable medium is not statutory.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bowser in view of Newberry.

Referring to claim 1, Bowser discloses a portable information terminal apparatus comprising:

acquiring means for acquiring a plurality of pieces of program information (column 4, line 60);

first display controlling means for controlling display on a display screen of said program information acquired by said acquiring means (column 4, lines 60-63);

second display controlling means for controlling display on said display screen of said other program information after retrieval by said retrieving means (column 5, lines 2-6).

Bowser does not disclose an apparatus with extracting means for extracting a time included in said program information; and retrieving means which, based on the time extracted by said extracting means, retrieves other program information about programs to be broadcast in a time slot relative to said program information.

Newberry discloses an apparatus with extracting means for extracting a time included in said program information; and retrieving means which, based on the time extracted by said extracting means, retrieves other program information about programs to be broadcast in a time slot relative to said program information (column 1, lines 53-57).

At the time of the invention it would have been obvious for one of ordinary skill in the art to add the time segment extraction taught by Newberry in the apparatus disclosed by Bowser. The motivation would have been to provide a small amount of

Art Unit: 2623

data to the PDA as it has a limit of how much information it can display at one time (Bowser: column 7, lines 18-20).

Claims 5, 6, and 7 are rejected on the same grounds as claim 1.

Referring to claim 2, Bowser does not disclose a portable information terminal apparatus according to claim 1, wherein said time is a broadcast start time.

Newberry discloses a portable information terminal apparatus according to claim 1, wherein said time is a broadcast start time (column 1, lines 53-57; Note: it would be inherent that a time segment would contain beginning and ending times).

At the time of the invention it would have been obvious for one of ordinary skill in the art to add the time segment extraction taught by Newberry in the apparatus disclosed by Bowser. The motivation would have been to provide a small amount of data to the PDA as it has a limit of how much information it can display at one time (Bowser: column 7, lines 18-20).

Referring to claim 3, Bowser discloses a portable information terminal apparatus according to claim 1, further comprising third display controlling means which, if any program name is selected by a user performing an operation from among said other program information displayed on said display screen under control of said second display controlling means, then controls display on said display screen of detailed program information about the selected program information (column 7, lines 31-39;

Note: the favorite channel creating system is being interpreted as the third display

controller).

Referring to claim 4, Bowser discloses a portable information terminal apparatus according to claim wherein, said other program information cannot be displayed entirely at one time on said display screen, then said second display controlling means calls up an un-displayed part of said other program information for display based on an operation performed by a user (column 7, lines 18-20 and 31-32).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Justin E. Shepard whose telephone number is (571) 272-5967. The examiner can normally be reached on 7:30-5 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Grant can be reached on (571) 272-7294. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
